

## Blank Bolts Program

BOLTS DELIVERED IN ONLY THE QUANTITIES THAT YOU NEED

Fastener Dimensions, Inc.'s Blanks Program is designed to improve delivery times while providing you with added savings. When you make a commitment for future orders of a specific part, we'll prepare lots that can be premanufactured, tested, and certified to spec at any point of the manufacturing process. We'll hold the excess partially finished pieces at our location until you are ready to reorder. When it is time for your next order they will be finished to your spec in smaller lots, as the are needed. Eliminate ever having to manage and store left-over inventory because you are required to place a minimum order that exceeds your immediate assembly needs.

FDI keeps your premanufactured parts on hand so that as soon as we hear from you we can pick up and complete your parts and fulfill your order without missing a beat.

The head start gained by premanufacturing with our Blanks Program significantly will cut fulfillment time and will help to reduce the need for rushed orders. Take advantage of production-wise manufacturing and enjoy the benefit of additional savings.
