We've made some exciting changes to the way we manage certs, and it comes with some terrific customer benefits! If you haven't yet heard of SmartCert, it's on the way to becoming the standard in cert transfer. Please read this email in its entirety as you will need to take action.

You will soon be receiving cert packages digitally via SmartCert, a universal platform for cert transfer.

This means:

- self-service tools
- automated inbound documentation
- 24/7 access when and where you need it
- a centralized archive of all inbound SmartCerts from your vendors
- real-time updates

I have attached a PDF outlining the platform and features for your **free account**. Please circulate to your team. You'll need to create one account for your company. You can learn more [here](#) or contact the support team at [support@smartcert.tech](mailto:support@smartcert.tech) with your questions.
